Junseo Min — Researcher

minjs4562@gmail.com • JunseoMin • junseo-min-b638582bb

Education

Kwangwoon University — **Seoul, South Korea**
B.S. in Robotics (Major)
B.S. in Computer Science (Minor)
Micro Module in Robot Intelligence — *2020.03–2026.02*

Korea Digital Training — **Seoul, South Korea**
Autonomous Driving Technician Training Program, Bootcamp — *2023.05–2023.10*

Awards & Scholarship

Scholarship — **Kwangwoon University**
KRW 1,118,000 (≈ USD 1,000) — *Summer 2025*
Merit-based award

Articles

***Junseo Min**,*Inseok Jeon, *Sumin Lee, *Yunkyo Hong, *Yaesop Lee, "AI-Based Worker Assistant Robot: Shaping the Future of Smart Farms", ICROS 2023 (* Equally Contributed)

Career

Machine Perception and Intelligence Lab (GIST) — **Gwangju, South Korea**
Research Intern — *2024.06–Present*
- Designed LiDAR reconstruction models using Point Transformer V3 and Perceiver architectures.
- Conducted research on localization-related models and advanced 3D reconstruction techniques

Immersion — **Seoul, South Korea**
Robot Engineer (full-time) — *2023.12–2024.09*
- Built outdoor HD maps and implemented SLAM pipelines for autonomous robots using 3D LiDAR and ROS2.
- Solved technical challenges like sunlight interference and resource limits on Jetson Orin.

Ubiquitous & AI Lab — **Seoul, South Korea**
Undergraduate Research Assistant — *2022.12–2023.12*
- Studied machine learning fundamentals and transformer attention modules through research papers and advisor discussions.
- Developed a stock price prediction model for the KRX competition using TensorFlow and advanced deep learning techniques.

Cheil Worldwide — **Seoul, South Korea**
2022 Samsung Unpack Project - Web QA (intern, full-time) — *2022.6–2022.09*
- Conducted QA for product description pages and collaborated with overseas teams.
- Developed an interest in software development, leading to a Computer Science minor.

Projects

LiDAR Upsampling for Localization: Researched deep learning-based point cloud upsampling to improve localization, using PointTransformer V3 and TULIP as baselines.

HD Map Implementation: Developed a high-definition map for advertising robots using ROS and FAST-LIO2. Researched sunlight interference solutions.

Attention Robot Implementation: Implemented Stanley controller, path planning, and NDT-OMP localization in ROS2, optimizing performance with OpenMP and Eigen.

Stock Prediction Model: Built a Transformer-based stock prediction model using KOSPI data.
SmartFarm worker assistant Robot: Developed end-to-end system for mushroom harvesting robot.

Activities

Kwangwoon University — **Baram**
Academic Research Club — *2020.03–2020.11*

Kwangwoon University — **Robotics Department**
Student Council — *2020.03–2020.11*

Republic of Korea Army — **Military Instructor**
Military Service — *2020.12–2022.05*

Skills & Interests

Programming: C++, Python, ROS1/2, PyTorch — *Strong*
Research Interest: SLAM, Navigation, Localization, DeepLearning — *Professional Interests*

Language

TOEIC — **ETS**
Score 915 — *May 2025*
English proficiency test
